

## Brahmatells Documentation

**Introduction: - Brahmatells is the Astrologer application, where it has 3 sub apps**

- a- Web application
- b- Mobile application
  - a- Web application is able show all astrologer information and provide facility to chat with astrologer by creating user account.  
There is some parts already implemented like-  
Website design  
Dynamic astrologer information displaying  
User registration and login.

### **Module which is not implemented-**

- 1- Manage user profile
- 2- Initiate chat-> check login-> if yes check amount, if no -> goto login/create.
- 3- Amount transaction management-> where deduct amount from user wallet and add in astrologer account.
- 4- Validate user wallet for chat.

### **Manage Wallet -**

- 1- Show all wallet recharge
- 2- Show all balance deduction
- 3- Filter recharge and deduction record.

### **Note:**

- 1- A chat initiate only when the user current wallet amount \* 3 is equal to higher to astrologer chat rate amount.
- 2- Chat within 3 minute can be cancel and amount can refund in user wallet on special request with terms and conditions.

## **Application Programming interface Task for Mobile Application –**

api development-

### **1. Implement api to initiate chat.**

- a. First Api at User side push information to firebase real time database
- b. Second Api to provide notification on astrologer app where it can accept or denied

### **2. Implement api to chat with astrologer**

- a. Push data on firebase of chat
- b. Receive data on mobile application
- c. Push mobile chat data on firebase server.

### **3. Implement api to show earned amount by astrologer.**

#### **Work on admin site->**

Manage chat history-

- 1- Show chat
- 2- Delete chat
- 3- Filter chat

#### **Manage Wallet history-**

- 1- Show all wallet recharge
- 2- Show all balance deduction
- 3- Filter recharge and deduction record.

#### **Task At On App-**

This is the basic part of astrologer, when a user can request for chat . And astrologer accept chat request and connect with chat. There is few points that will implement.

- 1- Manage astrologer profile.
- 2- Show chat request- able to accept or reject request.

Grace Tech  
Solutions

TRAINING DEVELOPMENT PLACEMENT

- 3- Perform chat with user.
- 4- Manage earned amount by astrologer- where amount deducted from user account will added in astrologer account.
